

INDEX TO VOL. VIII.

- ABELL, J. J.** On the behavior of extracts of the suprarenal gland toward Fehling's solution, xxx.
- ABELL, J. J.** On the elementary composition of adrenalin, xxix.
- ABELL, J. J.** On the oxidation of epinephrin and adrenalin with nitric acid, xxxi.
- Absorption after nephrectomy, xlii.
- Adrenalin, action upon blood-vessels, xlii.
- , composition, xxix.
- , oxidation, xxxi.
- Alcohol, action on muscle, 61.
- ALDRICH, T. B.** See **Houghton and Aldrich**, xviii.
- AMBERG, S.** The toxicity of epinephrin (adrenalin), xxxiii.
- Ammonia, determination in urine, 330.
- Artificial respiration in strychnine poisoning, xlii.
- ATWATER, W. O.** On the sources of muscular energy, xlii.
- BACILLUS coli communis**, chemical products, 284.
- Bacillus lactis aerogenes*, chemical products, 284.
- Blood, electrical potential, xlii.
- , laking, 441, xliii.
- Blood-corpuscles and other cells affected by acids, 99, 404.
- Blood-corpuscles, hemolysis, 103.
- Blood-pressure, in salmon, xlii.
- BOWEN, W. P.** Exhibition of mercury-mercury stimulator, xx.
- BOWEN, W. P.** Exhibition of new form of platinum-mercury stimulator, xx.
- Brain protagon, 183.
- CAMPHOR**, influence upon excretion of dextrose in diabetes, xxxii.
- CANNON, W. B.** Further observations on the movements of the stomach and intestines, xxi.
- CANNON, W. B.** Demonstration of the movements of the stomach and intestine, observed by means of the Röntgen rays, xli.
- CANNON, W. B.** and **H. E. DAVY**. Salivary digestion in the stomach, xxviii.
- CARLSON, A. J.** See **Jenkins and Carlson**, 808, 251.
- Cantharid, tracheal, xxiii.
- Cardio-pneumatoscope, xxli.
- Coagulation of milk, xxxv.
- CESARIO, H.** The effect of extirpation of the Gasserian ganglion upon the sense of taste, xxvii.
- DAVY, H. E.** See **Cannon and Davy**, xxviii.
- Diabetes, xxxii.
- Development of eggs affected by mechanical shock, 304.
- Diaphragm, apparatus for illustrating its action, xlii.
- Digestion, salivary, in stomach, xxviii.
- DODGE, R.** Five types of eye movement in the horizontal meridian plane of the field of regard, 307.
- ELECTRICAL**, convection of cells and nuclei, 273.
- Electrical polarity in hydroids, 204.
- Electro-magnetic signal, xxii.
- Energy, muscular, source, xlii.
- Epinephrin, xxxiii.
- , oxidation, xxxi.
- Eye movements in horizontal meridian plane of field of regard, 307.
- FATIGUE**, human muscle, 335.
- Fertilization, relation to development, 430.
- FISCHER, M. H.** How long does tarbacal sperm live in sea water? 430.
- FRANZ, S. I.** On the functions of the cerebrum: I. The frontal lobes in relation to the production and retention of simple sensory-motor habits, 1.
- Frog, long survival after removal of cerebral hemispheres, xlii.
- Frog table, xxii.
- Frontal lobes, localization of habits, 1.

- GAMGEE, A., and W. JONES. On the nucleoproteids of the pancreas, thymus, and suprarenal gland, with especial reference to their optical activity, 447, xlii.
- Gasserian ganglion, extirpation, xxvii.
- Gastric secretion, stimulated by alcohol, etc., xvii.
- Gelatine, digestion, xxiii.
- GIES, W. J. The influence of the H ion in peptic proteolysis, xxxiv.
- GIES, W. J. A proteid reaction involving the use of chromate, xvi.
- GIES, W. J. Further mucoid studies, xlii.
- GIES, W. J. See LUSEM and GIES, 183.
- GIES, W. J. See LOEB and GIES, xiv.
- GIES, W. J. See MEILZER and GIES, xlii.
- Glucophosphoric acid, xi.
- Glucothionic acid, xi.
- Glucuronic acid, origin, xiii.
- GRIHAM, F. P., and R. W. TOWER. Does potassium cyanide prolong the life of the unfertilized egg of the sea-urchin? 175.
- GRUNT, C. W. Arterial blood-pressure in the Sacramento salmon, *Oncorhynchus tshawytscha*, xlii.
- GRUNT, C. W. Osmotic changes in the Sacramento salmon during the run from the sea to the spawning beds, xlii.
- Growth on diet of skimmed milk, 197.
- GUTHRIE, C. U. The laking of dried red blood-corpuscles, 441, xliii.
- H**ABITS, localization, 1.
- Hemolysis, 103.
- HADJER, K. A., and T. SOLLMANN. The effect of diminished excretion of sodium chloride on the constituents of the urine, 139.
- Heart lever, xxxviii.
- Heart, maximal contraction, "staircase" contraction, refractory period, compensatory pause, 213.
- Heart muscle, affected by sodium chloride, 75.
- , tonus, xxvi.
- HOBARTON, E. M., and T. B. ALDRICH. A preliminary report on the pharmacological and chemical properties of tri-brom-tertiary butylalcohol, xviii.
- Human muscle, fatigue in voluntary contraction, 355.
- Hydroids, electrical polarity, 294.
- I**NDUCTORIUM, xxv.
- Intestine, movements, xxi, lxi.
- Ions, toxic and antitoxic effects, xiv.
- JACKSON, H. C. On the influence of camphor ingestion upon the excretion of dextrose in phlorhizin diabetes, xxxii.
- JACKSON, H. C. See MANDEL and JACKSON, xlii.
- JACKSON, H. C. See WALLACE and JACKSON, xvii.
- JENKINS, O. P., and A. I. CARLSON. The rate of nervous impulse in certain molluscs, 251.
- JENNINGS, H. S. Studies on reactions to stimuli in unicellular organisms. IX. On the behavior of fixed infusoria (*Stentor* and *Vorticella*), with special reference to the modifiability of protozoan reactions, 23.
- Joints, flexion and extension, xxiv.
- JONES, W. On the xanthin bases of the suprarenal gland, xlii.
- JONES, W. See GAMGEE and JONES, 447, xli.
- K**EV, mercury, xlii.
- Kidney, glomerular fluid by filtration or secretion, 155.
- Kymograph, xxxvii.
- L**ABORATORY apparatus, xxii, xxxv.
- LEE, F. S., and W. SALANT. The action of alcohol on muscle, 61.
- LEE, F. S. The action of ethylalcohol on contractile protoplasm, xix.
- LUSEM, W. W., and W. J. GIES. Notes on the "protagon" of the brain, 183.
- LEVENE, P. A. On glucophosphoric acid, xi.
- LEVENE, P. A. On glucothionic acid, xi.
- LEVENE, P. A. On nucleic acid, xii.
- LEVENE, P. A., and L. B. STOEKEY. On the biological relation of proteids and proteid assimilation, xxiii.
- LEVENE, P. A., and L. B. STOEKEY. On the digestion of gelatine, xxiii.
- Life, duration affected by potassium cyanide, 175.
- LILLIE, K. S. On differences in the direction of the electrical convection of certain free cells and nuclei, 273.
- LINGLE, D. J. The importance of sodium chloride in heart activity, 75.
- LOEB, J., and W. J. GIES. Further studies of the toxic and antitoxic effects of ions, xiv.
- LOEVENHART, A. S. Some observations on the coagulation of milk, xxxv.
- LOMBARD, W. P. The action of the two-joint muscles of the hind-leg of the frog, with special reference to the spring movement, xxiv.

- MACALLUM, A. B.** On the origin of the relation of the inorganic elements to protoplasm, xlii.
- MANDEL, J. A., and H. C. JACKSON.** On the origin of glyconic acid, xlii.
- MATHEWS, A. P.** Electrical polarity in the hydroids, 204.
- MATHEWS, A. P., and B. R. WHITCHER.** The importance of mechanical shock in protoplasmic activity, 300.
- Mechanical shock, effect on protoplasm, 300.
- MELTZER, CLARA.** See **MELTZER** and **MELTZER**, xlii.
- MELTZER, S. J., and W. J. GIES.** Studies on the influence of artificial respiration upon strychnine spasms and respiratory movements, xlii.
- MELTZER, S. J., and CLARA MELTZER.** The vasomotor influence of the third cervical nerve (auricularis magnus) upon the circulation in the rabbit's ear, xlii.
- MELTZER, S. J., and CLARA MELTZER.** The effect of the intravenous injection of adrenalin upon the blood vessels of the ear when deprived of their vaso-constrictors, xlii.
- MELTZER, S. J., and CLARA MELTZER.** The unmistakable vasomotor influence of subcutaneous injection of adrenalin, xlii.
- MELTZER, S. J., and W. SALANT.** The influence of nephrectomy upon absorption, xlii.
- MENDEL, I. B., and F. P. UNDERHILL.** New experiments on the physiological action of the proteoses, xvi.
- MENDEL, I. B., F. P. UNDERHILL, and B. WHITE.** A physiological study of nucleic acid, 377.
- Metabolism, in salmon before spawning, xlii.
- Milk, coagulation, xxxv.
- , skimmed, food value, 197.
- Moist chamber, xxii.
- Molluscs, rate of nerve impulse, 251.
- Mucoid, xlii.
- Muscle, action of alcohol upon, 61.
- Muscles, classification as flexors and extensors, xxiv.
- , second maximum in response to a series of stimuli, xxiv.
- , heart, affected by sodium chloride, 75.
- , human, "gap" in contraction, 435.
- , human, stimulation with induced currents, 355.
- Muscles, plain, tone affected by salts, 260.
- Muscle lever, heavy, xi.
- Muscle tonus, xxvi.
- Muscles, action upon joints, xlix.
- Muscular energy, source, xlii.
- NEPHRECTOMY,** influence upon absorption, xlii.
- Nerve impulse, rate, 251.
- Nucleic acid, xli.
- , action and fate in body, 377.
- Nucleo-proteids, 447, xli.
- , optical properties, 447, xli.
- OXYHEMOGLOBIN,** inhibition of crystallization, xlii.
- , quick crystallization, xlii.
- PEPSIN,** action influenced by acids, xxxiv.
- PESKIND, S.** Notes on the action of acids and acid salts on blood-corpuscles and some other cells, 93.
- PESKIND, S.** The action of acids and acid salts on blood corpuscles and other cells, 404.
- PORTER, W. T.** New inductorium, kymograph, heart lever, heavy muscle lever, and square rheochord, xxxv.
- PORTER, W. T.** The tonus of heart muscle, xxvi.
- Potassium cyanide, prolongation of life, 175.
- Potential, differences between blood and serum, etc., xliii.
- Proceedings of the American Physiological Society, ix.
- Protagon of brain, 185.
- Proteid metabolism, specific characters, xxiii.
- Proteid, reaction with chromate, xv.
- Proteolysis influenced by acids, xxxiv.
- Proteoses, physiological action, xvi.
- Protoplasm, contractility affected by ethyl-alcohol, xix.
- , inorganic elements, xlii.
- Protoplasmic activity affected by mechanical shock, 300.
- REICHERT, E. T.** Inhibitory phenomena in the crystallization of oxyhemoglobin, xlii.
- REICHERT, E. T.** Quick methods for the crystallization of the oxyhemoglobin of the blood of the dog and certain other species, xlii.
- REITGER, L. F.** An experimental study

- of the chemical products of bacillus coli communis and bacillus lactis aerogenes, 284.
Rheochord, square, xlii.
- SALANT, W.** See LEE and SALANT, 61.
SALANT, W. See MILLER and SALANT, xlii.
Salivary digestion in stomach, xxviii.
Salmon, changes in the run to the spawning beds, xlii.
SHAFER, P. On the quantitative determination of ammonia in urine, 330.
Sodium chloride excretion in urine, 139.
Sodium chloride retention, 155.
SOLLMANN, T. The mechanism of the retention of chlorides: a contribution to the theory of urine secretion, 155.
SOLLMANN, T. See HATCHER and SOLLMANN, 139.
Sperm, duration of life in sea-water, 430.
STEWART, C. C. Some minor improvements in laboratory apparatus, xlii.
STEWART, C. C. The second maximum in the response of muscle to stimulation, xxiv.
STEWART, G. N. Differences of potential between blood and serum and between normal and laked blood, xliii.
STEWART, G. N. The action of hæmolytic agents at 0° C., xliii.
STEWART, G. N. The behavior of nucleated colored blood-corpuscles to certain hæmolytic agents, 103.
SIBLEY, P. G. On the influence of calcium and potassium salts upon the tone of plain muscle, 269.
Stimulator, mercury-mercury, xi.
—, platinum-mercury, xx.
Stomach, movements, xxi, xli.
—, salivary digestion, xxviii.
STOCKEY, L. B. See LEVENE and STOCKEY, xliii.
STOREY, T. A. The influence of fatigue upon the speed of voluntary contraction of human muscle, 355.
STOREY, T. A. Variations in the amplitude of the contractions of human voluntary muscle in response to graded variations in the strength of the induced shock, 135.
Strychnine poisoning, affected by artificial respiration, xlii.
Suprarenal extract, 441, xli.
—, reducing power, xxx.
Suprarenal gland, xanthin content, xlii.
- TASTE** fibres, relation to trigeminus, xxvii.
Tone of plain muscle, affected by salts, 269.
Tonus of heart muscle, xxvi.
TOWER, R. W. See GORDHAM and TOWER, 175.
Tri-brom-tertiary butyl alcohol, pharmacological and chemical properties, xviii.
- UNDERHILL, F. P.** See MENDEL and UNDERHILL, xvi.
UNDERHILL, F. P. See MENDEL, UNDERHILL, and WHITE, 377.
Unicellular organisms, reaction to stimuli, 23.
Urine, constituents affected by diminished excretion of sodium chloride, 139.
—, determination of ammonia, 330.
- VASOMOTOR** fibres in third cervical nerve, xlii.
Vasomotor phenomena of ear, influenced by adrenalin, xlii.
- WALLACE, G. B., and H. C. JACKSON.** Is the action of alcohol on gastric secretion specific? xvii.
WHITCHER, B. R. See MATHEWS and WHITCHER, 300.
WHITE, B. See MENDEL, UNDERHILL, and WHITE, 377.
WILDER, B. G. A living frog from which the cerebrum was removed December 4, 1899, xlii.
WILDER, B. G. An improved apparatus for illustrating the action of the diaphragm, xlii.
WILSON, MARGARET B. On the growth of suckling pigs fed on a diet of skimmed cow's milk, 107.
WOODWORTH, R. S. Maximal contraction, "staircase" contraction, refractory period, and compensatory pause, of the heart, 213.
- XANTHIN** bodies in suprarenal gland, xlii.

THE AMERICAN
JOURNAL OF PHYSIOLOGY

EDITED FOR

The American Physiological Society

BY

H. P. BOWDITCH, M.D., BOSTON

R. H. CHITTENDEN, PH.D., NEW HAVEN

W. H. HOWELL, M.D., BALTIMORE

FREDERIC S. LEE, PH.D., NEW YORK

JACQUES LOEB, M.D., CHICAGO

W. P. LOMBARD, M.D., ANN ARBOR

W. T. PORTER, M.D., BOSTON

VOL. VIII.—No. V.

Issued February 2, 1903

BOSTON, U.S.A.
GINN AND COMPANY

1903

CONTENTS.

A PHYSIOLOGICAL STUDY OF NUCLEIC ACID. <i>By Lafayette B. Mendel, Frank P. Underhill, and Benjamin White</i>	377
THE ACTION OF ACIDS AND ACID SALTS ON BLOOD-CORPUSCLES AND OTHER CELLS. <i>By S. Peskind</i>	404
HOW LONG DOES (ARBACIA) SPERM LIVE IN SEA-WATER? <i>By Martin H. Fischer</i>	430
VARIATIONS IN THE AMPLITUDE OF THE CONTRACTIONS OF HUMAN VOLUNTARY MUSCLE IN RESPONSE TO GRADED VARIATIONS IN THE STRENGTH OF THE INDUCED SHOCK. <i>By Thomas Andrew Storey</i> .	435
THE LAKING OF DRIED RED BLOOD-CORPUSCLES. <i>By Charles Claude Guthrie</i>	441
ON THE NUCLEOPROTEIDS OF THE PANCREAS, THYMUS, AND SUPRARENAL GLAND, WITH ESPECIAL REFERENCE TO THEIR OPTICAL ACTIVITY. <i>By Arthur Gamgee and Walter Jones</i>	447

PROCEEDINGS OF THE AMERICAN PHYSIOLOGICAL SOCIETY . . . ix-xliii

THE AMERICAN JOURNAL OF PHYSIOLOGY is issued monthly. Each volume will contain about five hundred pages. The price of one volume sent postage free to subscribers in the United States and Canada is five dollars. To subscribers in other countries, five dollars and twenty-five cents (£1 2s.; marks, 22; francs, 27), payable in advance.

Subscriptions, manuscript, and all other communications should be sent to Dr. W. T. PORTER, 688 Boylston Street, Boston, Mass., U.S.A.

Contributors will receive fifty copies of their papers free; additional copies may be obtained at cost.

The American Journal of Physiology is represented:

In America, by GINN & COMPANY, 9 Tremont Place, Boston, Mass.

In Germany by R. FRIEDLÄNDER & SOHN, Berlin, N. W., Carlstrasse 11.

Copyright, 1903, by GINN & COMPANY.

Printed by John Wilson and Son, at The University Press, Cambridge, Mass.

Entered at the Boston, Mass., Post-Office as second-class mail matter, Feb. 13, 1901
